

## **CHAPTER V**

### **CONCLUSSION AND SUGGESTION**

This chapter presented the conclusions of the researched results on described the language style categories uttered in The Movie of Disney Mulan Lived action, and based on the results of this researched, the analysis results and the discourse results, presented also some suggestions.

#### **5.1 Conclusion**

Language styles realized characteristics that help people in communicating their intentions correctly. Talking to a younger person would be different than talking to an older person, or a respected one. Not only that, the situation also determined the use of language style, like language style when at an event, when speaking casually to someone closest to you. This was what showed how important it was to understand language styles in creating the right atmosphere in situational communication.

In addition to real experiences, the use of language styles could also found in a movie. Liebniis (2021) explained that movie is the art of moving images that depict the imagination or real experience of a society in an interesting way. Furthermore, Sprilia (2021) explained that dialogue in a movie uses different language styles to present several situations. So, by watching movies, people could also learn the application of language styles.

The study found 55 (100%) data on language styles with four categories:

Frozen or Oratorical 7.3%, Formal or Deliberative 29%, Consultative 27.3%, and Casual 36.4%.

By the existence of different language style categories used in this movie, proved that the choice of language style in communication had to be appropriate to a particular situation, if the application of a language style was not appropriate to its application would result in fatal errors in communication. This was the importance of learning language styles. Movies were a reflection of real life, so learning the language style through the style applied in movies could have been a good mean of learning.

## **5.2 Suggestion**

The results of research on language style categories uttered in The Movie of Disney Mulan Live action found the application of different language styles based on their categories proving that language style was a specific use of words, sentences, and language structure to create certain effects in communication. Based on this, it advised to teachers to use the results of this research as a teaching material in teaching the language style category that was sociolinguistics, knowledge. Similarly for students, to use the results of this research as a reference to learn about language style categories, because language style could not be separated from language, and its presence made communication good and accurate. Subsequent researchers were also advised to use the results of this research as a basis for further research on the same research object and topic.
